services

A B O U T U S

Creativity and excellent product knowledge are essential when it comes to designing the right lighting, and we pride ourselves on both, but it's our passion, flexibility, and personal approach that really sets us apart.

Based in MUMBAI, our team of light designers have years of experience in the lighting industry. We believe that good architecture is based around the fundamentals of natural light. When natural light is not available it is important that artificial light is used to enhance the natural look and feel of the space.

Whether it's your home, an art gallery, coffee shop or office, our exciting and intelligent designs turn the average into the fabulous.

Lighting changes everything.

MISSION

To be the out most trusted brand in Light Designing that guarantees correct light levels, compliance with current regulations, bringing you the look and feel that you want, but saving energy and money as well.

EXPERIENCE

Our product knowledge and experience with many different lighting manufacturers provide options, you would most likely not otherwise be aware of. Using the latest reliable technologies to provide flexibility and save you money.

P H I L O S O P H Y

We believe, “Lighting should be the heart of the architectural process” and to this end we challenge the boundaries in order to create visually stunning spaces that harness the suitable interplay amongst texture, form and colour.

WHAT WE DO?

As independent designers we choose products that bring your spaces to life but also offer great value for money, absolutely working with you and your budget. Creating that “special” feeling is paramount to the success. The Light Designing team SCALA helps you set the tone and execute flawlessly and with absolute professionalism. When it comes to designing and installing transformative lighting solutions for the important moments in your life, look no further than SCALA.

EXTERIOR LIGHTING

Exterior lighting is important equally as the interior lighting. It should be proper and functional, to provide relaxing atmosphere, and in the same time safety and fun. The lighting have big impact too the whole look of your garden and patio, and that's why you need to pay attention where will you set the lights, and what kind of lighting you will use to light up your yard.

INTERIOR LIGHTING

Detailed planning, drafting and execution are the cornerstones to our work. Comprehensive knowledge of industry standards lets us build the perfect setting for your office, home, restaurants or business. Lighting is a critical factor in creating a unique shopping environment: one that attracts customers and pulls them in, creates a store personality while reflecting brand and identity.

FACADE LIGHTING

At nightfall, building facades are transformed into objects of art. That is, with luminaries whose light emission sets special accents. They emphasize architectural features and render any building a real eye-catcher. During the day the luminaries blend discretely into the overall appearance, and during nocturnal hours they reliably set accents

BRIDGE LIGHTING

The lighting of bridges serves not only for orientation, but thanks to good design can also positively characterize urban appearances. A diversity of luminaries supply universal lighting solutions for the needs of traffic participants and city planners. This unites form and functionality of the lighting in an optimal way

PARK LIGHTING

Our lighting enhance the importance of recreation and leisure opportunities for people of all ages. Lighting communities are increasingly developing theme parks to keep up with demand and the latest lighting design trends. Our goal is to create lighting as facility that is both functionally and aesthetically pleasing.

ROAD ILLUMINATES

Road luminaries ensure safety. In residential areas, on traffic roads and on paths. But they also offer more: they lend landscapes, towns and cities a new appearance in darkness. Our aesthetically sophisticated and robust lighting solutions guarantee optimal lighting even under adverse conditions. LED technology gives such luminaries a long service life and almost complete freedom from maintenance, thus achieving efficiency to an unprecedented level.

R E S I D E N T I A L S E R V I C E S

To give your home the personal touch it deserves, we begin with your vision and blend in our comprehensive knowledge of the latest equipment and technologies. Lighting a residence requires thoughtful and careful planning and design. Proper lighting makes a difference in how one feels about their home. It adds drama and beauty to rooms, makes smaller rooms look more open and airy, larger rooms feel cozy and inviting.

C O M M E R C I A L S E R V I C E S

When it comes to commercials, SCALA team offers a collaborative client approach with comprehensive understanding - designing and installing powerfully effective design and production solutions that forms every single area a unique ambiance in itself. The psychological well being, interest, and enthusiasm of its employees. It should enhance the feeling of well-being and productivity, so consideration must be given to the design of the office interior to create a stimulating work place.

H O S P I T A L I T Y

Hospitality, by definition, is “the quality or disposition of receiving and treating guests and strangers in a warm, friendly, generous way.” Lighting plays a significant role in setting the mood and atmosphere in an establishment, whether it be a restaurant, hotel, resort or casino. There is no single formula to abide by or a “one size fits all” approach. It is important to create a careful balance between style, simplicity, functionality, and energy efficiency.

E V E N T L I G H T I N G D E S I G N S

SCALA is a full-spectrum provider of light designing and creative services. From sales kickoffs, industry seminars, awards ceremonies, and more.

C O N C E P T U A L L I G H T I N G

A unique area of expertise for Lighting Design Co. our approach to every project is as unique as every client requirement. We combine our client's vision with the latest technology to create a space rich in design and composition ambiance demands.

F A C A D E . . . a t g l a n c e

People find the nightscapes around them created by illuminated building facades. These facades facilitate orientation, convey messages, communicate emotions and create attention. Contemporary lighting solutions for building facades need to create added value for local authorities or have architectural or economic merit by making a location more beautiful and safer, showing a building off in the right light or getting a positive corporate image across. Achieving this demands great aesthetic design sensibility.

Nowadays, however, lighting solutions also need to be sustainable, save resources and prevent unnecessary light pollution. Scala lighting solutions shape a building's architecture and accentuate details in a multifaceted manner by directing light very precisely. These luminaries also cut energy consumption thanks to the use of efficient high-power LEDs. This enables Scala to strike a balance between cultural aspirations and the need to use resources responsibly.

SCALA combines years of experience with state-of-the-art lighting technology, giving our clients timely execution of project management with budgetary mindfulness.

Successful retail lighting does not come in a one-size-fits-all package, however, it is a strategic blend of colour, contrast, control, and energy efficiency.

KIRAN MADKHOLKAR
